

Pace1PTM

IP and PoE+ over Extended Distance CAT5e or UTP Transceiver

Description

Altronix Pace1PTM is a long range Ethernet transceiver designed for use with Pace1PRM, Pace4PRM, Pace8PRM, and Pace16PRM receivers. They transmit data at 100Mbps full duplex and power via a single twisted pair (UTP - when paired with Pace1PRM) or CAT5e or higher cable in a PoE(+) compliant format. Pace1PTM will not deliver power to non-compliant devices, thus avoiding damage to improperly connected non-PoE cameras/devices. The receiver passes the PoE(+) compliant power over the cable to the Pace1PTM transceiver which, in turn, passes this power to an enabled IP camera/device. These plug and play units facilitate cost-effective solutions for IP devices that need to be installed at distances greater than 100m. They also provide a simple way to replace legacy analog products with new IP devices over single twisted pair (UTP) (when paired with Pace1PRM) or structured cable.
