Hardware:

Installing Trove2R into Rack Tower:

Wiring methods shall be in accordance with the National Electrical Code/NFPA 70/ANSI, and with all local codes and authorities having jurisdiction. These products are for indoor use only and must be installed within the protected premises.

Note: First assemble and Install Z Bracket Wire Management Accessory (refer to Z Bracket Installation pg. 3)

1. Remove backplane from enclosure prior to installing into rack cabinet (do not discard hardware).
2. In order to mount included cUL Listed tamper switch (Tane Model 3/8 ASH FM WH or equivalent), turn the enclosure upside down and locate mounting holes (Fig. 1, pg. 2). Insert the tamper switch flying leads into the center knockout of the three (3) holes from outside of the drawer with the button facing outwards, make sure tamper switch is inserted properly then secure it with the two (2) screws (supplied). Connect tamper switch wiring to the Access Control Panel input or the appropriate UL Listed reporting device. To activate alarm signal open the rack drawer.
3. Slide the rack enclosure into an open 2U location in the four post rack cabinet.
4. Utilizing proper fasteners attach front ears to the rack rails (Rack Drawer, pg. 8).
5. Attach the rear of the adjustable slides to the rear rails of the rack cabinet with the proper fasteners.
6. Secure the rack cover (Fig. 2a, pg. 3) and rack drawer (Fig. 2b, pg. 3) to earth ground.
7. Ensure that all internal configurations (voltage selection, switch settings, etc.) are completed before mounting backplane back into Trove rack enclosure.
8. Refer to the eFlow Power Supply/Charger Installation Guide for eFlow104RLBV and corresponding Sub-Assembly Installation Guides for the following models: ACMS8(CB), LINQ8ACM(CB), PDS8(CB), VR6 for further instructions.
